@KUNSKAPSSKOLAN

GOAL

KUNSKAPSSKOLAN'S MISSION

Is to develop and operate outstanding schools where students, through personalized learning and clear goals will stretch their boundaries and learn more than they thought possible.

KUNSKAPSSKOLAN'S EDUCATION VISION

is to empower every student to master the challenges of today and shape the world of tomorrow.

VALUES

ALL PEOPLE ARE DIFFERENT

All people are different and learn in different ways and at different rates. It is our task to meet this challenge. Regardless of his or her ability, each student has the right to a personal challenge every day.

WE HAVE HIGH EXPECTATIONS

With the support of teachers who are well qualified, stimulating and have high expectations, each student will, through their own hard work, perseverance and ambition stretch their boundaries and learn more than they thought possible. We highlight good performance as an example to be followed and encourage our students to set challenging goals for which there are clear requirements.

WE EDUCATE FOR LIFE

We prepare students to live and work in the modern, global society with its ever-changing challenges and difficult choices. 'Education for life' gives students the ability to see context and patterns, understand and interpret events, take decisions and make choices. It is a driving force for a continual deepening and broadening of their knowledge, skills and understanding.

LIFE IS WHAT I MAKE IT

We will give each student a foundation for personal development where self-discipline, self-knowledge, sense of responsibility and confidence in one's own ability provide the basis for a constructive attitude, the essence of which is "Life is what I make It"

ACHIEVE

WHY KUNSKAPSSKOLAN

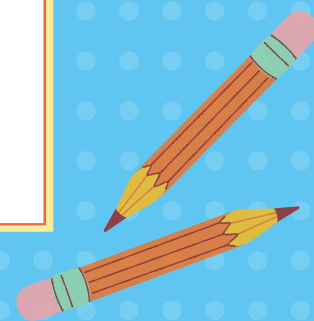

1

The KED program is integrated with the CBSE/Cambridge curriculum. This integration provides students with the best of both worlds- an in-depth knowledge base learnt in a goal focused personalized manner.

3

We work on developing Self Regulated Learners, students who direct the pace of their own learning. This helps give the real-life experience of studying and working in a modern, globalized world.

2

The delivery of the curriculum is directed by the needs of the individual student. This way students delve deeper into understanding 'what', 'how' and 'why' of their learnings.

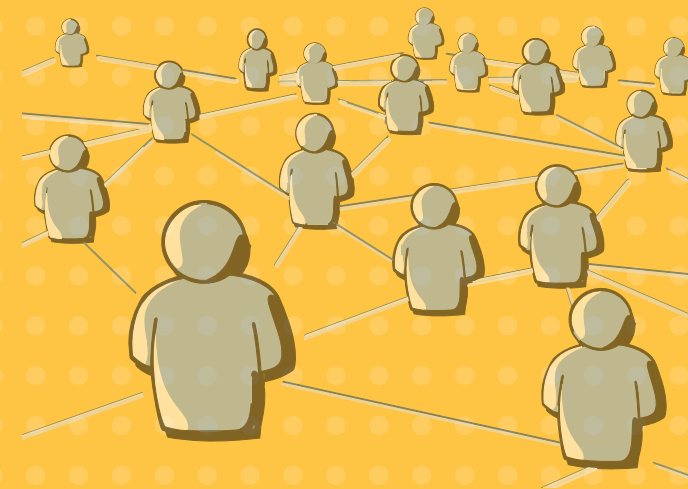

4

We follow a Personalised Learning methodology in which KED Teachers are instrumental. They are highly trained, subject matter experts and coaches who work with students to help them achieve more than they thought possible develop individual effective learning strategies.

5

Our 100 strong schools global network allows our students to participate in knowledge sharing and collaboration with KED students across the world. Through this they mature as true global citizens.

KED is not a program, it's a way of life

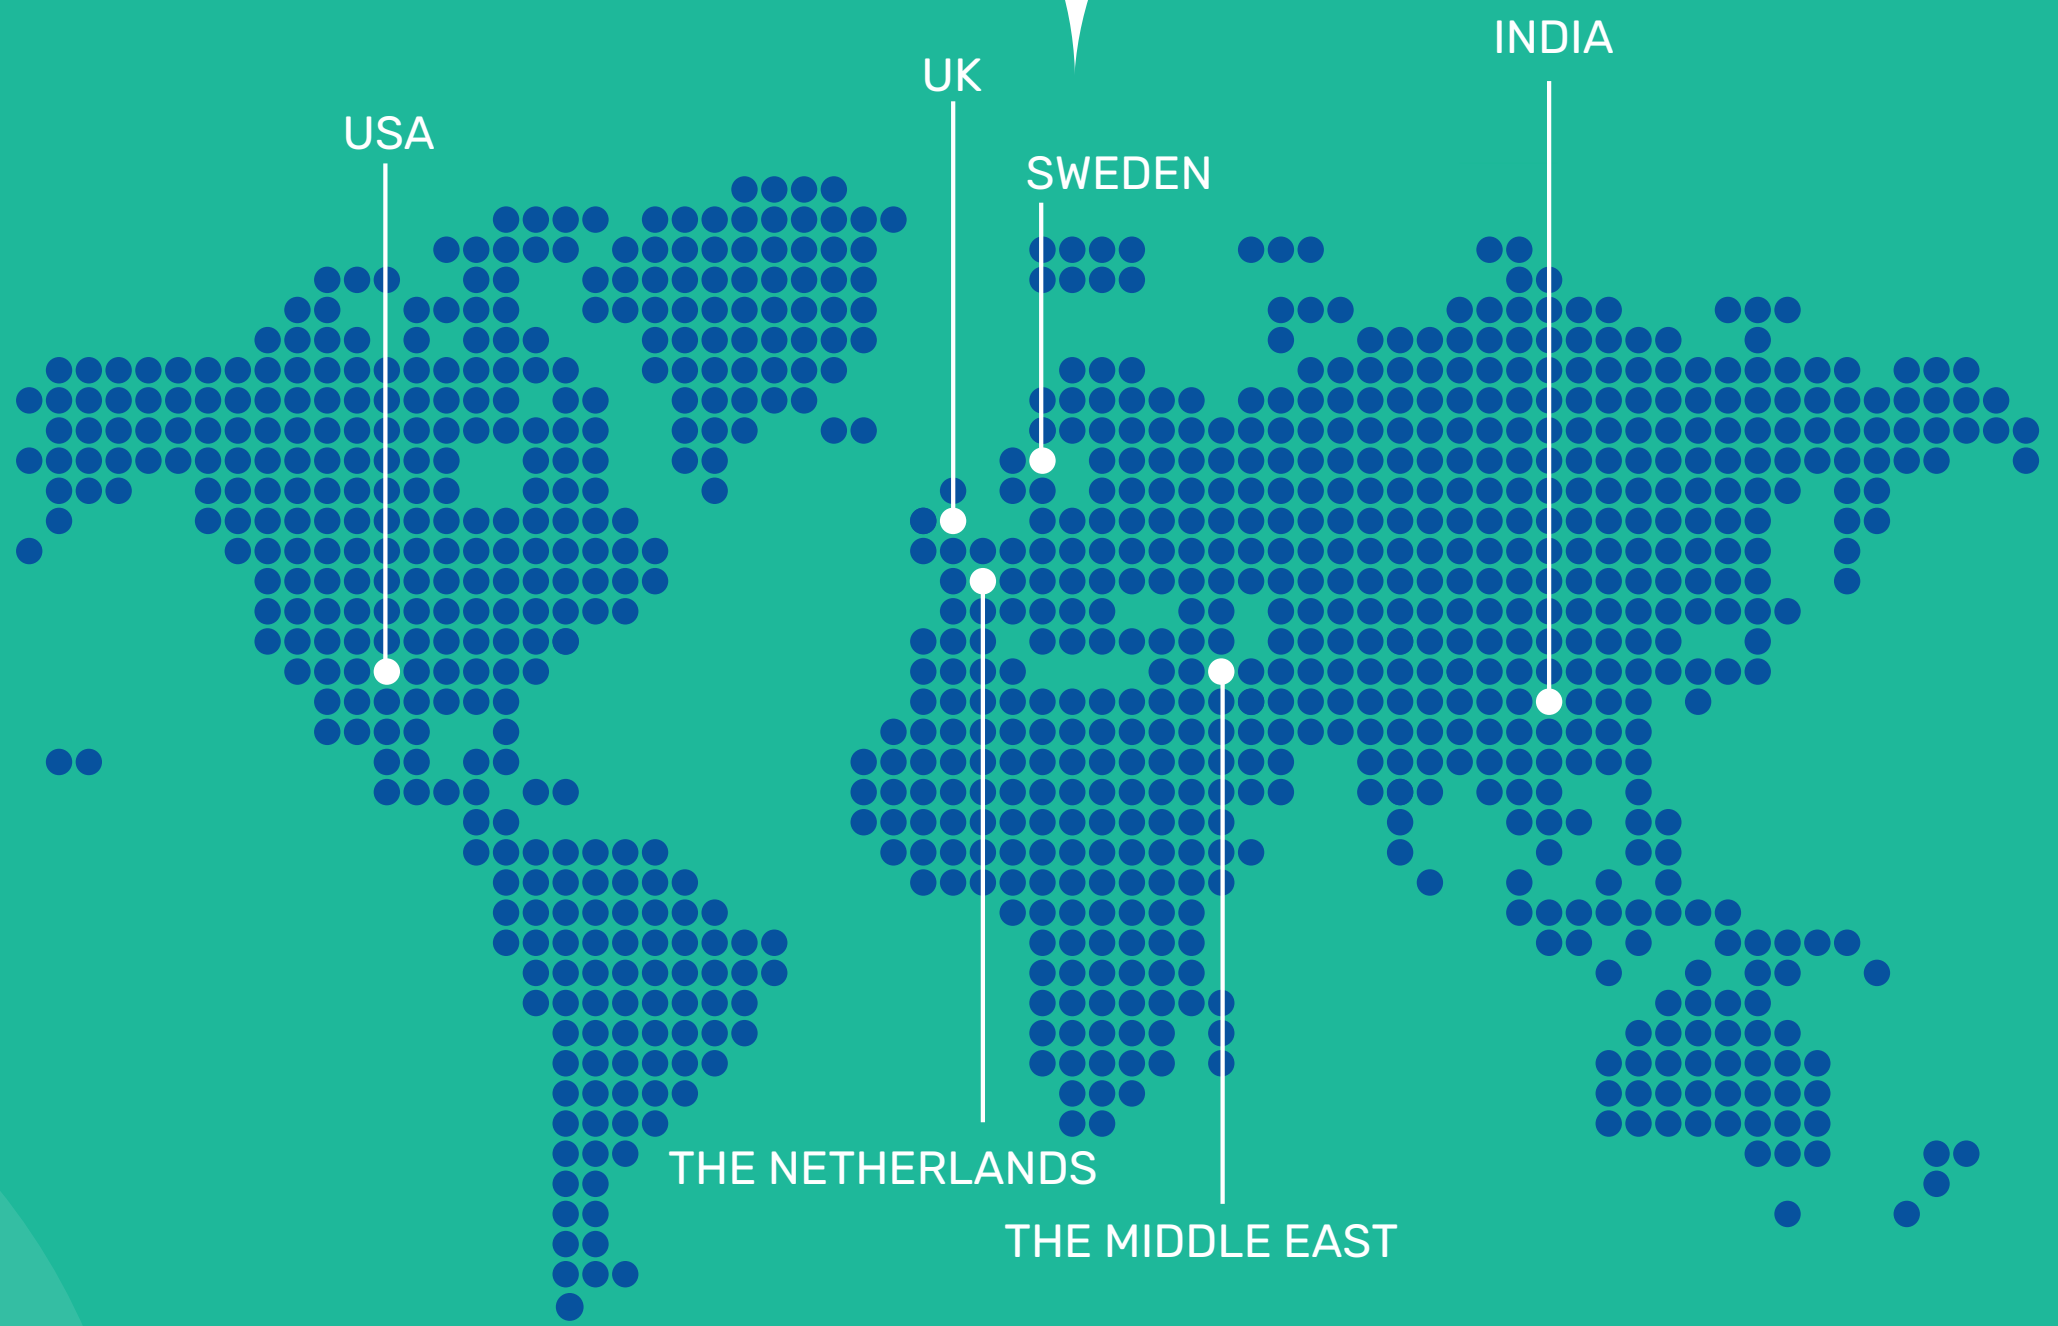

SELF REGULATED LEARNERS

Through **Personal Coaching**, students have a scheduled discussion with their coach on a weekly basis. This discussion follows up and assesses each student's performance according to the set goals and strategies by reflecting on their schoolwork, results and strategies. Reviewing and reflecting on their own learning process is a central part of the student's discussion with the coach. As an outcome of the discussion,

Each student has a **Logbook**. It is a planning tool with his/her learning goals, activities/assignments and timetable for the coming week. The logbook is the main tool for the student's planning and reflection process. It is a central tool for personalized learning.

Reflection is a process that helps the students, as well as the teacher, understand the effectiveness of individual goals and strategies devised by the student. This process enables students to investigate the success of their strategies as well as identify areas of improvement. It is an essential part of becoming a self regulated learner, to examine their own plans in order to streamline them to better achieve their

When needed, but at least once every six months, students have a progress tracking review or **Development Discussions** with their personal coaches. During the discussions, the goals and strategies for the student's course of study are discussed and assessed in detail. The review sheds light on the student's school situation from a personal and social perspective. The discussion also highlights whether a revision of

Kunskapsskolan Schools India offer a range of curriculum choices to students all of which are integrated with our unique Swedish KED program.

This integration allows for the powerful KED tools to help our students become goal-oriented, independent and future-ready life-long learners.

THE TEACHER

Subject Matter Expert

Our teachers are selected after a rigorous screening process from which we select only those teachers who have an impeccable grasp over their subjects, are highly motivated and expertly trained in the KED Program.

Personal Approach

A teacher is a personal coach to every student who is part of her 'base group' who are also personal coaches to their students. This personal coaching contributes to the student's personal development as the learning is structured, supported, assessed, and followed up. The teacher as a personal coach helps students learn how to set clear, realistic, yet challenging academic goals.

General Teacher

The teacher serves as a support resource for all students in the school, teaching the students how to learn, mediate and explain general strategies. The teacher also serves as a role model for students.

Team Player

Kunskapsskolan teachers are organized into subject specific teams. The teachers in these teams work together to plan, review, develop, and evaluate their work. Through this teamwork they ensure continued excellence in curriculum delivery.

INFRASTRUCTURE

At Kunskapsskolan, every space is a learning space. The Infrastructure aligns with our culture of openness and transparency and stimulates learning. The open classrooms, wide corridors, predominance of glass used in our schools stem from our architectural philosophy - to provide a safe, pedagogically effective environment for personalised learning. We design and build schools that have rooms of different sizes and character. It emulates a modern workplace preparing students for life.

Life and Future Skills

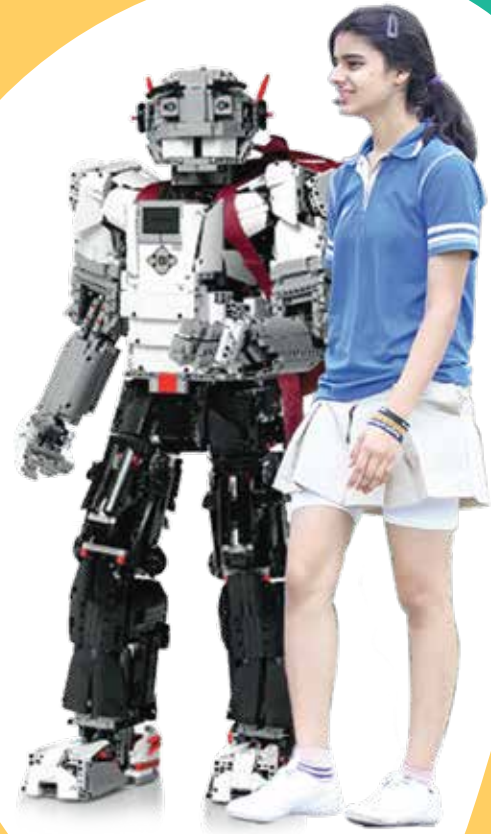

The world needs more leaders and visionaries who are self-driven and ambitious but at the same time sensitive and empathetic. The Life skills program at Kunskapsskolan Schools caters to that sentiment.

We encourage our students to develop a robust set of skills through our Life Skills program. It is devised in a way that every student/learner spends a few hours every day in school learning a sport, expanding their skill set in academic fields, tinkering with technology to become young innovators, explore their creativity through constructing and designing activities, learning how to play an instrument or learning to take responsibility for the community as well as themselves through a community development program. Students can practice, and perfect a diverse range of skills at Kunskapsskolan schools.
